

PennHIP Report

Referring Veterinarian: Dr Todd Baker
Email: ftmacvet@hotmail.com

Clinic Name: Fort Macleod Veterinary Clinic
Clinic Address: 609 12 St
Fort Macleod, AB T0L 0Z0
Phone: (403) 553-4887
Fax: (403) 553-2924

Patient Information

Client: Payne, Kelsie
Patient Name: Puppy Loves the Bees Knees
Reg. Name: Puppy Loves the Bees Knees
PennHIP Num: 171838
Species: Canine
Date of Birth: 28 Nov 2020
Sex: Female
Date of Study: 08 Apr 2022
Date of Report: 12 Apr 2022

Tattoo Num:
Patient ID: Bee
Registration Num:
Microchip Num: 9560000011555962
Breed: LABRADOODLE
Age: 17 months
Weight: 18 lbs/8.2 kgs
Date Submitted: 08 Apr 2022

Findings

Distraction Index (DI): Right DI = 0.26, Left DI = 0.26.
Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.26.

OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 10352 canine patients of the LABRADOODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.31 - 0.75) for the breed. The breed average DI is 0.50 (solid square). The patient DI is the solid circle (0.26).

SUMMARY: The degree of laxity (DI = 0.26) ranks the hip within the tightest 5% of DIs for the breed. This amount of hip laxity places the hip at a minimal risk to develop hip OA. **No radiographic evidence of OA for either hip.**
