

Canine Genetic Health Certificate [™]

Call Name:

Cha Cha

Registered Name:

Partitime's Doin' the Cha Cha

Breed:

Australian Labradoodle

Sex:

Female

DOB:

March 2013

Laboratory #:

10727

Registration #: Tattoo:

ALAA-040920

PTT 25aCC

Certificate Date:

June 23, 2015

This canine's DNA showed the following genotype(s):

Disease	Gene	Genotype	Interpretation
Centronuclear myopathy	PTPLA	WT/WT	Normal
Cystinuria (Labrador Retriever type)	SLC3A1	WT/WT	Normal
Degenerative myelopathy	SOD1	WT/WT	Normal
Exercise-induced collapse	DNM1	WT/WT	Normal
Familial nephropathy (Cocker Spaniel type)	COL4A4	WT/WT	Normal
Glycogen storage disease VII, PFK Deficiency	PFKM	WT/WT	Normal
Myotubular myopathy 1	MTM1	WT/WT	Normal
Narcolepsy (Labrador Retriever type)	HCRTR2	WT/WT	Normal
Neonatal encephalopathy with seizures	ATF2	WT/WT	Normal
Progressive retinal atrophy, Progressive rod-cone degeneration	PRCD	WT/WT	Normal
Von Willebrand disease l	VWF	WT/WT	Normal

WT, wild type (normal); M, mutant

Paw Print Genetics™ performed the tests listed on this dog. See the Laboratory Report for interpretation and recommendations based on these findings. The genes/diseases reported here were selected by the client. Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. These tests were developed and their performance determined by Paw Print Genetics. This laboratory has established and verified the tests' accuracy and precision. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. Genetic counseling is available at Paw Print Genetics.
