

PennHIP Report

Referring Veterinarian: Dr Todd Baker
Email: ftmacvet@hotmail.com

Clinic Name: Fort Macleod Veterinary Clinic
Clinic Address: 609 12 St
Fort Macleod, AB T0L 0Z0
Phone: (403) 553-4887
Fax: (403) 553-2924

Patient Information

Client: Payne, Kelsie
Patient Name: Riot
Reg. Name:
PennHIP Num: 132412
Species: Canine
Date of Birth: 21 Nov 2018
Sex: Male
Date of Study: 09 Jul 2019
Date of Report: 10 Jul 2019

Tattoo Num:
Patient ID: Riot
Registration Num:
Microchip Num: 982126051100524
Breed: LABRADOODLE
Age: 8 months
Weight: 25.6 lbs/11.6 kgs
Date Submitted: 09 Jul 2019

Findings

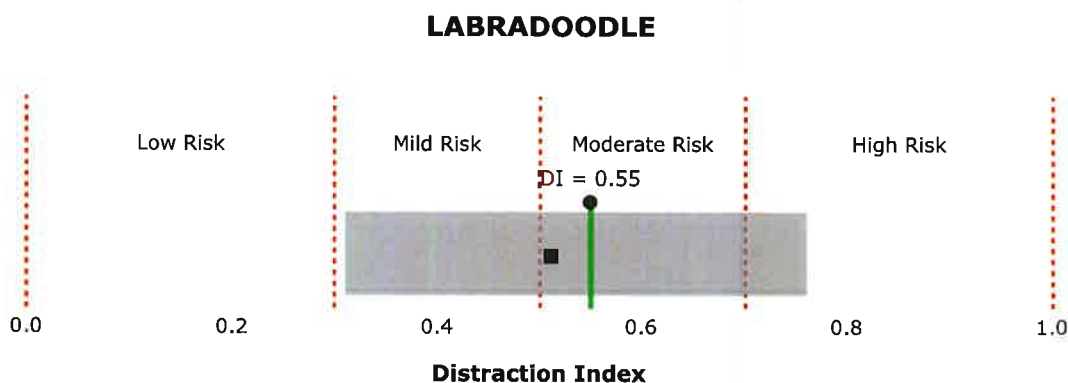

Distraction Index (DI): Right DI = 0.55, Left DI = 0.51.
Osteoarthritis (OA): **No radiographic evidence of OA for either hip.**
Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.55.

OA Risk Category: The DI is between 0.50 and 0.69. This patient is at moderate risk for hip OA.

Distraction Index Chart:

BREED STATISTICS: This interpretation is based on a cross-section of 7045 canine patients of the LABRADOODLE breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.31 - 0.76) for the breed. The breed average DI is 0.51 (solid square). The patient DI is the solid circle (0.55).

SUMMARY: The degree of laxity (DI = 0.55) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a moderate risk to develop hip OA. **No radiographic evidence of OA for either hip.**
